

AP STYLE 7000

Style 7000 is manufactured from ultra-high purity flexible graphite with a multiple braid construction. There are no binders, resins or wire present that could cause pump sleeve or valve stem damage. Style 7000 is resilient, compressible and thermally conductive. Because the packing is self-lubricating it requires little or no product lubrication. Style 7000 is fire safe and compatible with most fluid mediums. Flexible braided graphite packing provides long life, low maintenance, and leak free operation in most all applications.

Because of this packing's unique characteristics it can withstand acids, caustics, alkalis, steam, and oil in high temperature applications, and effectively seals all types of pumps, valves, and soot-blowers. Style 7000 is available as individual rings, combination sets, and in bulk.

Standard Sizes

Size	1/8	3/16	1/4	5/16	3/8	7/16	1/2	9/16	5/8	3/4	7/8	1
Ft/Lb	86	50	24	16	11	8.3	6.2	4.9	4	2.9	2.1	1.6

SPECIFICATIONS

Maximum Temperature
1200° F in Steam
850° F in Atmosphere

Maximum Pressure
4500 PSI

Maximum Shaft Speed
4000 FPM

Ph Range
0-14

Construction
Lattice Braid
