

**AP STYLE 718OX**

Style 718OX is braided from pure Teflon fibers, utilizing a special handling process and heat treated to allow its use in Oxygen service. Because Teflon is chemically inert, this packing will provide excellent service in highly corrosive chemical environments.

While style 718OX can be used in a wide range of services, it is primarily designed for high-pressure oxygen valve packing. Style 718OX is available as individual rings, combination sets, and in bulk.

**Standard Sizes**

<b>Size</b>	1/8	3/16	1/4	5/16	3/8	7/16	1/2	9/16	5/8	3/4	7/8	1
<b>Ft/Lb</b>	75	36	21	13	8.8	6.8	5.4	4.1	3.4	2.2	1.8	1.2

**SPECIFICATIONS**

**Maximum Temperature**  
**-400° F to 550° F**

**Maximum Pressure**  
**2000 PSI in Valves**  
**300 PSI in Pumps**

**Maximum Shaft Speed**  
**2400 FPM**

**Ph Range**  
**0-14**

**Construction**  
**Lattice Braid**
