

AP STYLE 725GFO

Style 725 is manufactured from high strength GFO expanded TFE fibers which trap and encapsulate finely ground graphite particles. A high temperature lubricant is applied to insure high performance and easy break in. Style 725 is an excellent choice as a general service asbestos free packing. This superior packing is wear resistant due to its low co-efficient of friction and will not abrade shafts.

Because of this packing's extreme versatility it can withstand corrosive chemicals, acids, high pressure water, and condensates on centrifugal and reciprocating pumps and valves, mixers, and agitators. Style 725 is available as individual rings, combination sets, and in bulk.

Standard Sizes

Size	1/8	3/16	1/4	5/16	3/8	7/16	1/2	9/16	5/8	3/4	7/8	1
Ft/Lb	69	36	21	14	10	7	5.7	4.5	3.5	2.5	1.9	1.5

SPECIFICATIONS

Maximum Temperature
600° F

Maximum Pressure
500 PSI in Valves

Maximum Shaft Speed
4300 FPM

Ph Range
0-14

Construction
Lattice Braid
