

AP STYLE 747

Style 747 Kevlar® is braided from DuPont’s high strength, aramid fiber. Each strand is impregnated with a Teflon suspensoid for easy break-in and easy run-in. This high tensile strength fiber forms a resilient durable packing capable of withstanding severe abrasives and high-pressure fluids.

Style 747 will handle corrosive, abrasive fluids, slurries, air, oil and gases on rotating and reciprocating shafts, valves and plungers. Style 747 is available as individual rings, combination sets, and in bulk.

Standard Sizes

Size	1/8	3/16	1/4	5/16	3/8	7/16	1/2	9/16	5/8	3/4	7/8	1
