

AP STYLE 441

Style 441 is manufactured from a blend of fine cork particles and neoprene, forming a smooth and compressible sheet. It has high tensile and tear resistance, and low compression set. Style 441 will take medium bolting pressure, has excellent heat resistance, and moderate swelling in oils and fuels.

Cork & Neoprene sheet works well on oils, gasoline, freon, and most solvents. is good for gaskets requiring low to medium torque loads such as fluid seals, gear boxes, oil seals, and valve covers.

Style 441 is available in sheets, bulk rolls (special order), and pre-cut gaskets.

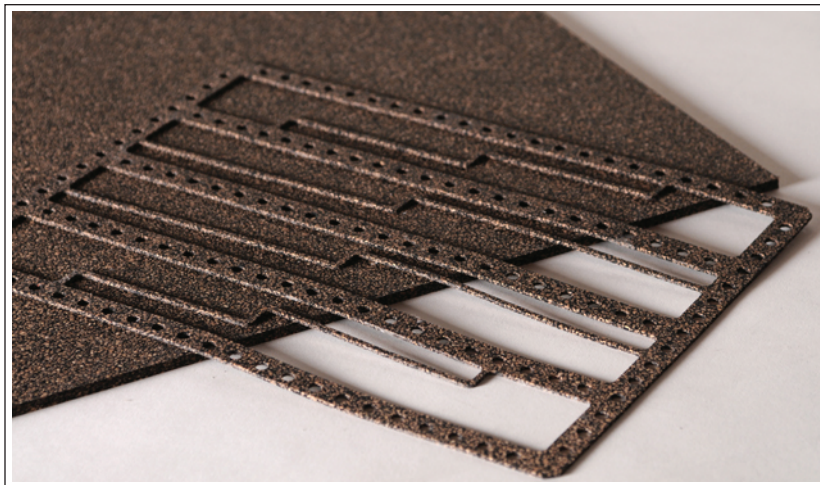

Standard Sizes

Thickness

1/32", 1/16", 3/32", 1/8", 5/32", 3/16", 1/4", 5/16",
3/8", 1/2"

Sheet Sizes

36" x 36" width

SPECIFICATIONS

Maximum Temperature
225° F

Durometer
65 (+/-5) Shore A

Density
42 Lb/Ft³

Tensile
250 PSI

Compression
25-35% @ 400 PSI

Recovery
80%

ASTM Callout
MIL C 6183B
CL II G B
